

Brookfield Renewable Power

In business for more than a century, Brookfield Renewable Power is an experienced owner, operator, developer and manager of renewable power generation facilities in the United States, Canada and Brazil. Our focus on low-cost and long-life hydroelectric generation has resulted in one of the largest privately-owned hydroelectric portfolios in the world. We also have a growing portfolio of wind generation, including one of Canada's largest windpower installations.

Our renewable power assets are unique in nature and generate electricity from clean sources with virtually no greenhouse emissions or pollution. Brookfield Renewable Power's operations are focused on health and safety, the environment, and preserving the value of our renewable assets for the long-term.

Aubrey Generating Station
(Mississagi Operations, Canada)

Salto Natal Generating Station
(South Region, Brazil)

Asset portfolio

▶ 171 generating facilities

Energy sources

▶ Hydro and wind

Total installed capacity

▶ Over 4,300 megawatts (MW)

Annual generation

▶ Over 16,000 GWh

Storage capacity

▶ Over 3,400 GWh

Number of employees

▶ Over 1,800

Geographic diversification

▶ 66 river systems

Ownership

▶ Wholly-owned subsidiary of Brookfield Asset Management (TSX/NYSE: BAM.A and BAM Euronext Amsterdam: BAMA)

A Sustainable and Socially Responsible Company

Active partner in the communities where we operate and develop new projects

Strong ties with local stakeholders, including aboriginal communities

Low Impact Hydropower Institute certification for 43 hydro facilities in New York and Maine – more than any other hydropower operator in United States

Twenty-one hydro facilities certified by Environment Canada's Environmental Choice Program (EcoLogo)

The first energy company to sell carbon credits from its small hydro facilities in Brazil
